Subject: Kalamazoo River Area 3 Field Sampling July 23, 2013
Date: Wednesday, July 24, 2013 10:52:31 AM

Tuesday, July 23, 2013

On site today: AMEC, CDM, Georgia Pacific (Chase Fortenberry, part of the day) and CH2M HILL.

Adherence to the Sampling Plan:

- No deviations from the plan were observed

Work Completed Today:

AMEC collected:

- Two biased bank samples from the residential area (a total of three were collected)
- All mill race samples (four transects, three samples each)
- One supplemental floodplain soil sample was collected from the north side of the river, west of the Farmer Street bridge. Gray material observed. ("E-FSP-001", 25 inches to refusal.)
- AMEC continued surveying sampling points and processing core samples.
- Processing includes material description, photographic documentation, containerizing, labeling, chain-of-custody

Other Information: None

H&S Concerns: Poison ivy. Field team is exercising caution around poison ivy and while working in or near water. One tick was found on a field team member, not embedded.

Final Comments: None
